1. Which behaviour demonstrates emotional intelligence in conflict resolution?

- **Correct Answer: (a) Listening actively and validating feelings**
- **Page/Slide Number:** Page 83 (Lecture III, Slide 83)
- **Slide Heading:** Social Skills / How social relation and emotional intelligence are linked together
- **Grounding:** The lecture identifies active listening and conflict resolution as key social skills and explains that empathy supports trust and smoother conflict resolution.

2. When recovering from illness, which choice reflects balanced self-care?

- **Correct Answer: (c) Gradually resuming responsibilities with rest breaks**
- **Page/Slide Number:** Page 116–119 (Lecture V, Slides 3–6)
- **Slide Heading:** Introduction / Why resilience and self-care matters
- **Grounding:** The lecture defines self-care as coping with illness and explains that regular rest and self-nourishment help prevent chronic stress and exhaustion.

3. Which element most influences identity exploration in adolescence?

- **Correct Answer: (d) Experimenting with different roles and values**
- **Page/Slide Number:** Page 21, 26 (Lecture I, Slides 21, 26)
- **Slide Heading:** Mental Health Determinants / Fostering Independence and Autonomy
- **Grounding:** Identity exploration is listed as a mental-health determinant, while adolescents are encouraged to explore different career paths, interests, and relationships.

4. What improves the quality of group decision-making?

- **Correct Answer: (a) Considering diverse viewpoints before deciding**
- **Page/Slide Number:** Page 98, 102 (Lecture IV, Slides 8, 12)
- **Slide Heading:** Enhancing Problem-Solving Skills / Seeking Support and Guidance
- **Grounding:** The lecture emphasizes analysing problems, evaluating potential solutions, making informed decisions, and seeking perspectives from others.

5. Which preparation strategy reduces nervousness before public speaking?

- **Correct Answer: (b) Practicing relaxation techniques like progressive muscle relaxation**
- **Page/Slide Number:** Page 64 (Lecture II, Slide 30)
- **Slide Heading:** Relaxation Techniques
- **Grounding:** The lecture states that progressive muscle relaxation reduces test anxiety and stress and helps learners cope with academic hurdles.

6. What strengthens resilience during long-term challenges?

- **Correct Answer: (d) Building supportive relationships and coping strategies**
- **Page/Slide Number:** Page 117–118, 131 (Lecture V, Slides 4–5, 17)
- **Slide Heading:** Emotional Resilience / Why resilience and self-care matters / Role of Support Systems
- **Grounding:** The lecture identifies social resources and coping strategies as contributors to resilience and describes social connection as a protective factor.

7. What is a common outcome of unmanaged academic stress?

- **Correct Answer: (c) Decline in concentration and motivation**
- **Page/Slide Number:** Page 41 (Lecture II, Slide 7)
- **Slide Heading: Major Transitions in Student's Life**
- **Grounding:** The lecture states that severe stress can affect students' mental health and harm performance, motivation, and self-esteem.

8. Which lifestyle habit promotes sustainable self-care?

- **Correct Answer: (a) Establishing consistent sleep routines**
- **Page/Slide Number:** Page 61, 121 (Lecture II, Slide 27; Lecture V, Slide 7)
- **Slide Heading: Sufficient Sleep / Physical Self-Care Strategies**
- **Grounding:** The lecture emphasizes adequate, peaceful sleep for physical and mental performance and lists adequate sleep as a physical self-care strategy.

9. How can individuals transform mistakes into growth opportunities?

- **Correct Answer: (c) Journaling reflections and setting improvement goals**
- **Page/Slide Number:** Page 101, 104, 138 (Lecture IV, Slides 13, 16; Lecture V, Slide 24)
- **Slide Heading: Practicing Self-Reflection / Embracing Failure as a Learning Experience / Creating a Personalized Self-Care Plan**
- **Grounding:** The lecture explains that journaling and reflection help extract lessons, while treating failure as feedback supports continuous improvement.

10. What is a healthy coping response when stress builds suddenly?

- **Correct Answer: (a) Using mindfulness to regain focus**
- **Page/Slide Number:** Page 65, 127 (Lecture II, Slide 31; Lecture V, Slide 13)
- **Slide Heading: Mindfulness Meditation / Importance of Mindfulness**
- **Grounding:** The lecture explains that mindfulness focuses attention on the present moment, reduces overthinking and stress, and supports focus and emotional regulation.

Summary

1. A – Listening actively and validating feelings.
2. C – Gradually resuming responsibilities with rest breaks.
3. D – Experimenting with different roles and values.
4. A – Considering diverse viewpoints before deciding.
5. B – Practicing relaxation techniques like progressive muscle relaxation.
6. D – Building supportive relationships and coping strategies.
7. C – Decline in concentration and motivation.
8. A – Establishing consistent sleep routines.
9. C – Journaling reflections and setting improvement goals.
10. A – Using mindfulness to regain focus.

Final Answers: 1-A, 2-C, 3-D, 4-A, 5-B, 6-D, 7-C, 8-A, 9-C, 10-A.
